

## State of Validation

Based on the SOC 2 readiness assessment performed by Socify, **Evolved Academics LLC** has undergone a structured evaluation of its control environment aligned with the applicable AICPA Trust Services Criteria (TSC).

### 1. AICPA Trust Services Criteria (TSC).

This validation confirms that, as of **27 April 2026**, the organization has implemented and documented policies, procedures, and controls designed to address the in-scope Trust Services Criteria.

The assessment focused on evaluating control design, implementation status, and readiness for an independent SOC 2 audit.

### 2. About Socify

Socify is a compliance readiness platform that helps organizations prepare for industry-recognized security and compliance frameworks and standards.

Through a combination of automated evidence collection, control mapping, expert guidance, and continuous compliance workflows, Socify enables organizations to:

- Establish compliance-ready security programs
- Identify and remediate control gaps
- Maintain audit readiness over time

### 3. Assessment Scope

The SOC 2 readiness assessment was conducted for the following scope:

#### 1. Framework:

SOC 2 Type I

#### 2. Trust Services Criteria Covered:

- Security

#### 3. In-Scope Systems:

The scope includes the primary production systems and supporting infrastructure used to deliver the organization's services, including relevant applications, cloud environments, databases, networks, and supporting platforms that process, store, or transmit organizational and customer data. Specific system components and boundaries are defined in alignment with the Applicable Trust Services Criteria and the organization's service delivery model

#### **4. In-Scope Processes**

- Information Security
- Access Control
- Change Management
- Incident Response
- Vendor Risk Management
- Business Continuity & Disaster Recovery

#### **5. Audit Date**

**2026-04-04**

#### **4. Limitation of Use**

This Letter of Validation is intended solely for informational purposes and may be shared with customers, partners, or other stakeholders to demonstrate SOC 2 readiness status.

It must not be represented as a formal audit report or compliance certification.
